

Number: 460-E-DS-682/19

Date: 19 December 2019

**SUBJECT: Supplementation and amendment of the documentation related to public procurement**

Based on the Section 1.4 of the Instructions to the tenderers for preparing a bid for a public procurement "PERCUTANEOUS AORTIC VALVES", published on the public procurement portal on 18 November 2019, publication number JN008030/2019-B01 and in the Official Journal of the republic of Slovenia on 19 November 2019, publication number 2019/S 223-546545, the contracting authority is **supplementing and amending** the documentation regarding the public procurement as follows:

Ident 920400

Under the IDENT 920400 the tenderers are required to offer a self-expanding biological percutaneous aortic valve suitable for percutaneous implantation and which may have the indication for transapical approach.

The contracting authority will establish the suitability of tendered items during the review of the bids.
